Windows 7 Logo Program

Software and Hardware Pre-submission Testing by Harbinger Systems

Microsoft Windows 7 Logo Program® provides strong ROI to hardware and software vendors alike. Successful execution of the certification process needs:

- Time and attention
- Quality test infrastructure
- Technical knowledge
- Overall awareness about the program

Harbinger Systems provides Windows Logo testing services to small and large Hardware & Software vendors, including one of the world's largest operating system manufacturers. We have in-depth knowledge and experience of product life cycle, and our testing services can help your product gain the right to carry the Windows Logo on its packaging

- Our testing process is simple and focused
- We will assist you all the way; from requirement analysis and scoping to result submission.
- We provide different test execution options for catering to all product stages.
- We house a variety of hardware setups for broader test coverage.
- Our experienced engineers go beyond trivial test execution and monitor, to provide primary triage information
- All our test projects are given equal priority and attention to ensure best results
- We provide economical pricing models and help you get more for your investment

Why Logo Certify

Windows Logo Program is designed by Microsoft to ensure compatibility of 3rd party software applications, devices and systems with Windows operating systems. As a result, buyers and users of Windows Logo'd products have high degree of confidence. Manufacturers and developers who proactively get their products logo certified enjoy valuable benefits like

- Using Microsoft Windows artwork on products
- Publishing software and updates through Microsoft's Driver Distribution Center (DDC) and Windows Update
- Listing of product on Windows Compatibility Center, Windows Logo'd Product List and Windows Device Experience List
- Obtaining valuable product reviews and issue reports from Windows Error Reporting (WER)
